Who Is WAEVT?

The WAEVT was begun in 1967 as the Wisconsin Fire Equipment Mechanics Association, by a group of fire equipment mechanics that thought it would be a good idea to provide local, low cost training and share information for mechanics that work on fire equipment. In the over 50 years since then, we have provided training and support for fire department and municipal technicians that work on emergency apparatus.

In 2000 the name was changed to the Wisconsin Association of Emergency Vehicle Technicians to more accurately reflect the changes to the field that modern technology has brought.

Mission

The mission of the WAEVT is to provide the best possible training locally at a low, affordable cost.

EVT Testing

EVT testing will be offered Thursday, May 21st at **3:15 PM**. Registration with EVT Certification Commission is required. For more information and to register, go to www.evtcc.org.

EVT Testing is not included in the seminar fee.

****Please note seminar location is the FVTC Public Safety Training Center****
